

PINT OF SCIENCE

SCIENCE TALKS IN YOUR LOCAL PUB

15
MAY

RISE AND FALL OF THE DINOSAURS

Dinosaurs roamed the Earth for ~150 million years until a massive asteroid impacting the Earth triggered a mass extinction event. The talk for this evening will firstly focus on the origin of dinosaurs, before moving on to discuss the extinction event that caused their demise.

16
MAY

CARBON DIOXIDE: LOVE - HATE RELATIONSHIP IN THE AIR AND OCEANS

Carbon dioxide is essential for life on Earth but too much may not be good. Our first talk will focus on microscopic organisms found in Antarctic oceans, explaining their evolving need for carbon dioxide. In our second talk, we will learn about the future of air travel and how too much carbon dioxide can have negative impacts on human activity.

17
MAY

THE EARTH'S ROLLER COASTER

The ground we live on is not as rock-solid as we might think. Be it rain from the skies, or magma from deep beneath, the face of the Earth changes everyday. In our first talk, we will explore how we can decode the processes shaping our landscape, before we go deeper underground to look at magmas piercing the Earth's crust and thereby helping to produce fossil energy. A true geological roller coaster ride!

THE HAND AND FLOWER, 1 HAMMERSMITH ROAD W14 8XJ

Doors 7.00pm, Event 7.30pm to 9.30pm

Tickets: pintofscience.co.uk/events/london
